

Call for a PhD candidate

Lentiviruses, viral restriction factors and rabbit immunology

We are looking for a highly motivated graduate student, who is interested in pursuing a PhD degree in the field of virology, evolution and functional biology, studying lentiviruses, viral restriction factors and rabbit immunology. This work is in a scope of an ongoing collaboration between CIBIO-InBIO and University of Munich (LMU), Germany, to study rabbits as a model for HIV. The project involves molecular biology techniques and computational analyses.

The student will interact with an international team of scientists at CIBIO-InBIO in the Vairão Campus, Portugal, and at the LMU, Germany, under the supervision of [Pedro Esteves](#) (CIBIO-InBIO) and Hanna-Mari Baldauf (University of Munich).

The application should include the following information:

- Motivation letter with a short biography and research interests;
- *Curriculum vitae* summarizing education, experience, other qualifying activity and a list of publications;
- Copy of master degree and course grades;
- Names and contact information of two referees.

The application must be written in English and sent by e-mail to pjesteves@cibio.up.pt until **February 28, 2019**.
